Popis předmětu

Nevíte si rady s předměty? Možná Vám pomůžou naše [návod](#)y. V případě problémů se ujistěte, že máte modul nastaven do správného akademického roku.

Byla nasazená funkcionalita, která zajišťuje, že soubory nahrané k předmětu "ve vztahu matka" jsou dostupné u předmětů "ve vztahu dcera".

Pokud vám nejdou editovat texty u vašeho předmětu, zkontrolujte si, že máte nastavený správný akademický rok. Změnu můžete provést v menu nastavení.

Comparative Economics - JEB103

Anglický název: Comparative Economics

Podoba výuky: přednáška

Zajišťuje: [Institut ekonomických studií \(23-IES\)](#)

Fakulta: [Fakulta sociálních věd](#)

Platnost: od 2025

Počet semestrů výuky: 1

Semestr: zimní

E-Kredity: 6

Způsob provedení zkoušky: zimní s.:

Rozsah, examinace: zimní s.:2/2, Zk [HT]

Počet míst: neomezen / neomezen (97)

Maximální kapacita předmětu: 97

Minimální obsazenost: neomezen

4EU+: ne

Virtuální mobilita / počet míst pro virtuální mobilitu: ne

Stav předmětu: vyučován

Jazyk výuky: angličtina

Forma uskutečňování: prezenční

Další informace: <http://dl1.cuni.cz/course/view.php?id=453>

Možnost opakovaného zápisu: 2 / 2 / 1 / 2

Poznámka: předmět je možno zapsat mimo plán
povolen pro zápis po webu
při zápisu přednost, je-li ve stud. plánu

Garant: [Ing. Vilém Semerák, M.A., Ph.D.](#)

Comparative Economics Syllabus 2026 Fall.pdf

Sylabus. Další soubory a informace jsou dostupné přes systém Moodle.

[Ing. Vilém Semerák, M.A., Ph.D.](#)

Anotace - [čeština](#)

The course will be taught in the traditional way (on-site) during Fall 2026. No streaming or recording of lectures is planned for this semester.
Note: Lectures and seminar sessions will be taking place in room 314 on Fridays (3:30-4:50 p.m., 5:00-6:20 p.m.).

More detailed information on this course are provided on Moodle: <https://dl1.cuni.cz/course/view.php?id=453>

This course aims to help students get familiar with the major concepts, selected models, and disputes in comparative economics (comparative economic systems). We will discuss different features of the main historical economic systems, the effects of their features on the economic behaviour of economic agents, and implications for overall performance. As usual in modern literature, the emphasis is put on the role of institutions, and the interaction between the setup (and the evolution) of institutions and economic performance/stability.

Because of the specific economic history of Central Europe, compared to other similar courses, this course focuses a bit more closely on the differences between market economies and the alternative systems, such as the Soviet (and Czech) central planning or the Yugoslavian model with worker-managed companies. The causes of the main problems in alternative systems will be analyzed, as will the problems faced by reformers attempting to achieve a transition back to market models. Development of countries with state capitalism and specific features of the Chinese and Russian economies will be covered, too., including the role and evolution of informal institutions (corruption and organized crime).

Poslední úprava: Semerák Vilém, Ing., M.A., Ph.D. (27.09.2026)

Cíl předmětu - angličtina

Course Learning Objectives:

At the end of the course, its students should:

- Understand the basic features of different economic systems,
- Understand the importance of institutions and the role of the state (centralized power) in the development of (market) economies.
- Understand different approaches in analyzing and comparing real economies,
- Understand main concepts useful for explaining the troubles of centrally-planned economies.
- Understand the change from central planning (and authoritarian regimes) to market economies (with liberal/illiberal democracies) in Central and East Europe.
- Understand the specific features of current state-capitalism like systems, with the focus on Russian and Chinese economies.

Poslední úprava: Semerák Vilém, Ing., M.A., Ph.D. (27.09.2026)

Podmínky zakončení předmětu - angličtina**Grading :**

Continuous work during the course, active and honest participation in the teamwork, and successful participation in the midterm and final exam are expected from all participants.

Components of the grade:

- Brief summaries / critical evaluations of assigned texts. These will be written during seminar sessions, there will be 4 such sessions during the semester. Each of these will be worth 5% (i.e. their total contribution to grade equals 20 % (points)). They will be taking place in the 3rd, 6th, 9th and 12th week.
- Midterm quiz: 20 % (points) in the 7th week.
- Final test at the end of the semester: 60% (points) - several options/dates will be offered.
 - The test will include
 - A quiz consisting of multiple-choice questions
 - Solution of problem sets, mainly by means of models and graphs. The creative thinking and understanding of the problem (e.g. described by a model), will be graded higher than a mere memorization of facts or formulas.
 - A brief essay on one of several provided topics.

All submitted written work in this course must be original, plagiarism will not be tolerated.

Grading scale:

91% - 100% : A

81% - 90% : B

71% - 80% : C

61% - 70% : D

51% - 60% : E

0% - 50% : F

Poslední úprava: Semerák Vilém, Ing., M.A., Ph.D. (01.10.2025)

Syllabus - angličtina

Course outline with dates:

- Introduction: What is Comparative Economics about? How do we compare economies? Typology of models. Traditional explanation of the identified differences. (October 2nd)
- Focus on institutions. Role of property rights. Inclusive v. extractive institutions. Role of the state. Dynamics of economic systems – Acemoglu & Robinson. (October 9th)
- Traditional economies: choosing between the "absent Leviathan"(with a cage of norms) or the "Despotic Leviathan"? Seminar session: New Traditional Economy. Islamic economics. **First summary. (October 16th)**
- Development of market economy. Acemoglu & Robinson's „Red Queen” hypothesis. US „Gilded Age”./Seminar session: variety of market economies. (October 23rd)
- Socialist alternatives: motives, concepts, Socialist calculation debate. Development of applied alternative models. (October 30th). Note: possible absence (if relevant, it will be compensated in January).
- Design and implementation of a centrally-planned system(s). Soviet-styled model of central planning: problems. **Second summary. (November 6th)**
- Theoretical explanations of the problems of non-market models. Problems with information flows, corruption. Soft budget constraints. Seminar session: **Midterm (November 13th)**
- Transition back to market: ideas, implementation, early results. GDR as a special case. Introduction to privatization. (November 20th)
- Transition with focus on privatization: methods, effects on companies, implications for wealth distribution, elites. Russia: from turbulent 1990s to Russian state capitalism? **Third summary. (November 27th)**
- Chinese society and economy: institutional history. China under central planning. (December 4th)
- Chinese reforms and the development of the Chinese economic model. (December 11th)
- India: from "License Raj" to Modi. Caste system and other specific problems of Indian economy. **Fourth summary. (December 18th)**
- Reserved for a make-up session (possibly for October 30th). Discussion of other interesting cases/models, such as Vietnam. (January 8th)
