

Econometrics II

JEB110 : Course Syllabus

Fall 2026

Lecturer:	Barbara Pertold-Gebicka (gebicka at fsv.cuni.cz)
Lectures:	Wednesdays, 12:30-1:50pm
Teaching Assistants:	Kai Wang (KW) (kai.wang at fsv.cuni.cz) Oliver Škultěty (OŠ) (oliver.skultety at fsv.cuni.cz) Veronika Plachá (VP) (85675870 at fsv.cuni.cz)
Seminars:	Wednesdays, 3:30 – 4:50pm (group 1) Wednesdays, 6:30 – 7:50pm (group 2) Thursdays, 2:00 – 3:20pm (group 3)

Textbook: J.M. Wooldridge, Introductory Econometrics, South-Western College Publishing

Software: The official course statistical software is R.

Course description and Objectives:

The objective of the course is to teach students how to use econometric methods to identify and quantify economic relations, how to deal with the data and interpret the results. Together with Econometrics I, the course will prepare students to carry out independent empirical projects (not only for Bachelor Thesis but also practical job-oriented projects) and to take the Advanced Econometrics course.

Home Assignments:

There will be four (4) home assignments during the semester. The goal of home assignments is to theoretically and empirically practice the given portion of material studied during the course and to get feedback on your understanding and interpretation of the material. Assignments will be posted on the website of the course during the semester. Please, send the assignments to the teacher specified in the setup or upload to SIS within the stated deadline (usually two weeks after posting). Assignments handed in after the deadline will receive no credit. Please append your R-codes to the assignments. Students are encouraged to form **groups of two** for solving the assignments; each such group should submit one solution with the names of both participating students on the front page.

Home assignments' dates:

HA1: announced on October 12, deadline October 19
HA2: announced on October 26, deadline November 9
HA3: announced on November 16, deadline November 30
HA4: announced on November 30, deadline December 14

Exams:

There will be a one-shot midterm exam on **November 11, 2026, at 12:30pm** testing students' theoretical and practical knowledge of material covered during the first six lectures.

There will be a final exam scheduled on several alternative terms. The final exam will test students' theoretical and practical knowledge of material covered during the whole course.

Grading:

Assignments: 0 – 40 points (max. 10 points each)
 Midterm Exam: 0 – 20 points
 Final Exam: 0 – 40 points (to pass the Final, one needs more than 20 points)

91 – 100 points: Grade A
 81 – 90 points: Grade B
 71 – 80 points: Grade C
 61 – 70 points: Grade D
 51 – 60 points: Grade E
 0 – 50 points: Fail (F)

Schedule:

Week	Lecture date	Topic	Reading	Seminar dates	Seminar by
1.	Sept 30	Unbiasedness, consistency, and efficiency	Ch. 2, 5	Sept 31 Oct 1	OŠ
2.	Oct 7	Time Series I	Ch. 10	Oct 7,8	OŠ
3.	Oct 14	Time Series II	Ch. 11	Oct 14,15	OŠ
4.	Oct 21	Time Series III	Ch. 12	Oct 21,22	OŠ
5.	Oct 23	Panel Data I	Ch. 13	Oct 29,30	KW
6.	Nov 4	Panel Data II	Ch. 14	Nov 4,5	KW
7.	Nov 11	MIDTERM EXAM	Ch. 10-14	Nov 11	VP
8.	Nov 18	Instrumental Variables & 2SLS	Ch. 15	Nov 18,19	VP
9.	Nov 25	Simultaneous Equations Models	Ch. 16	Nov 25,26	VP
10.	Dec 2	Limited Dependent Variables I	Ch. 17.1	Dec 2,3	KW
11.	Dec 11	Limited Dependent Variables II	Ch. 17.2-17.5	Dec 11,12	KW
12.	Dec 16	Repetition	Ch. 10-17	Dec 16,17	VP
	TBA	FINAL EXAM	Ch. 10-17
